## EXTRUDER SCREENS

ALSO CALLED SCREEN PACS

wstyler.com

### EXTRUDER SCREENS FOR:

Plastic Recycling

Plastic Injection  
Molding

Pelletizing

Containers

Pharmaceutical  
Grade Material

Industrial  
Applications

W.S. Tyler produces wire cloth extruder screens. These are used in the plastic melt filtration process and are of the highest quality. We can produce them in various configurations, including options for single and multilayer designs, rim bound and raw edge filters.

W.S. Tyler can work with your R&D team to get exactly the products they need manufactured to the specifications required.

# CUTTING-EDGE ENGINEERING. HANDCRAFTED PRECISION.

- Extruder Screens and Strainer Discs
- Available in stainless steel, carbon steel, brass, etc.
  - Different sizes are available upon request.
  - Various shapes are available, i.e. circles, kidney and rectangular.
  - Configurations are available from single layer to custom spot-welded multilayer screens.
  - These filters can be designed with retention ranges from anywhere between 10 and 1,000 microns.

## WHAT WE DO

For over 140 years, W.S. Tyler has been a leader in the design, engineering, and manufacturing of woven wire cloth and mesh materials.

## WHO WE ARE

While remaining true to our roots, the heritage of W.S. Tyler is important to us. Everything we do is in honor of who we have always been.

Obsessed with Precision
